## ENGINEERING SPECIFICATION ANALYSIS

*Focus Area: p*

*Generated on December 03, 2025*

I don't have a defined focus area for the analysis (e.g., "Nozzle Load Analysis", "Pipe supports", "Relief valve sizing"). Please specify the exact focus/topic you want me to evaluate for the provided document.

Also — the attached document appears to be a personal résumé/CV, not a plant design or engineering submittal. Do you intend me to analyze this resume for a technical procurement/engineering focus, or did you mean to attach a different engineering/design document?

- The specific focus area required (industry-standard task).
- Whether the provided resume is the correct document to analyze or whether you'll re-upload the intended engineering document.
