## ENGINEERING SPECIFICATION ANALYSIS

*Focus Area: ejrkkyk*

*Generated on December 03, 2025*

**I don't have a specified focus area for the analysis (e.g., "Nozzle Load Analysis", "IMU/Load metrics", "Ball tracking position accuracy"). Please specify the exact focus/topic you want me to extract and evaluate from the attached FIFA EPTS Test Manual (for example "Load Index evaluation", "Position & Speed data submission requirements", "gRPC live-data message fields", "Acceleration effort thresholds", etc.).**

- Retrieve and summarise industry-standard methods and required parameters for that focus.
- Compare those standards with the content of the submitted document.
- Extract only the specifications, requirements, and explicit measurement data in the document relevant to that focus, presented in the three required sections.
