ENGINEERING SPECIFICATION ANALYSIS

Focus Area:

Generated on November 25, 2025

I'm ready to analyze the document, but I need you to specify the focus area for the review (the {user_input} in the instructions). Examples"Nozzle Load Analysis", "Nozzle Load Requirements", "Anchorage & Anchor Bolt Design", "Seismic Design", "Roof Seal / Floating Roof Requirements", "Vendor Data Requirements for Nozzle Loads", etc.

- Retrieve industry-standard methods/specs relevant to that focus,
- Compare those with the document content,
- Extract only the specifications, inputs and measurement data in the document that are directly relevant to the chosen focus, and present them in the three required sections.
