## ENGINEERING SPECIFICATION ANALYSIS

*Focus Area: p*

*Generated on December 03, 2025*

**I don't have a defined focus area ({user\_input}) to use for the analysis. Please specify the exact technical focus you want analyzed (for example "Nozzle Load Analysis", "Pressure vessel design inputs", "Heat exchanger nozzle loads", "Nozzle reinforcement and pad details", etc.). Also note the attached document is a personal résumé/CV, not a plant design or engineering submittal. If your intent is to have a plant design document analyzed, please upload the correct engineering/design file. If you do want me to analyze the résumé for technical skills or match it to a procurement/engineering role, say so and I will proceed.**
